The Standard Barometer and Thermometers are read at 8 A.M., 10 A.M., 5 P.M., and 8 P.M., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The station of the Barometer is twenty-two feet above the level of the sea, and the receiver of the Rain Gauge is ten feet from the ground. The wind, rain and general weather registered are for the current Civil Day—from midnight to midnight.

The total quantity of rain collected since January 1st is 28.10 inches, the average for the same period being 28.10 inches.
